

**Task:** You're familiar with the ongoing discussions about the role of technology in language learning. Write an essay in which you:

- Introduce the topic of technology's influence on language education, providing an overview of its impact and advancements.
- Discuss the role of technology-driven language learning for students' language proficiency and motivation.
- Explore the potential advantages and challenges of incorporating technology into language learning, citing examples or personal experiences.
- Conclude by sharing your predictions or thoughts on the future of technology in language education and recommend further exploration of this topic to your peers.

Please write 300-350 words. You have 80 minutes to complete the task.

Notes
